Applied Research in Earth Sciences (ARiES) Summer School

Los Alamos NATIONAL LABORATORY EST. 1943

THEME

Machine Learning for Geosciences

May 29 – August 3, 2018

Los Alamos National Laboratory

Work on emerging and critical research in global security, energy and environment, and space and climate science

RECEIVE

Prestigious Research Fellowship

Technical Training and Professional Development from Internationally Renowned Geophysics, Space and Computational Scientists

Application due January 15, 2018

See http://aml.lanl.gov

for listing of project topics and application process

Open to U.S. or U.S. based foreign PhD students studying earth science, planetary science, aerospace engineering, applied and computational mathematics, computer science, electrical engineering, or related field

Sponsored by Center for Space and Earth Science and Information Science and Technology Institute
