STAIRS & HANDRAILS

Stairs have their ups and downs – do not let them trip you up!

Here are some things to keep in mind…

Walk each step – and ***ALWAYS*** use the handrail.

Do not skip steps, and ***NEVER*** run.

Do not miss a step and slip when moving down.

Do not catch a lip and trip when going up.

Check each step, and watch for uneven steps.

Make sure you see where you are going,
if you are carrying a load.

ALWAYS keep one hand free for the handrail.

For ourselves and each other…
let's take care on each stair.
