

**3M Empore™ Radiochemical Sampling Products:
Improving selective separation and counting in the lab and during field sampling!**

**Albuquerque Marriott
Conference Room - AB
3:45 – 5:30
Sunday, November 15, 1998**

The 3M Filtration Products' workshop will present an overview of the use of Empore™ Rad Disks both in the radiochemical laboratory and during field sampling. The workshop will include discussions by end-users of their Rad Disk applications. Technical information on innovative field sampling techniques and products, Rapid Liquid Samplers (RLS), will be reviewed. Data from site demonstrations will also be presented.
