

4 November 2001
Session 4, 3:30 p.m.

Oak Ridge National Laboratory Intercomparison Studies Program Users Meeting

An informal users meeting for participants (and interested parties) in the Oak Ridge National Laboratory (ORNL) bioassay Intercomparison Studies Program (ISP) will be held. Since 1992 the ISP has provided natural urine blind/double blind QC samples on a monthly basis to various DOE sites, universities and private organizations throughout the United States and Europe. Synthetic fecal, nasal smears and whole body count samples are also provided. Topics to be discussed at this meeting include a general program description, program traceability, report format, and general program feedback.
