Title: Chromium Remediation Injection Wells

Description of Product or Service Required

Los Alamos National Laboratory (LANL) is seeking to: 1) Identify potential Offerors for the drilling services described in the attached summary (dated 04/13/2015); 2) Select companies to receive a request for proposal; 3) Determine the feasibility of making the procurement a full or partial Small Business Set-aside.

Submit company information, a summary of relevant experience, a description of equipment and key subcontractors that would be used, and TRC/DART statistics. Proficiency in both drilling methods is not necessary to submit an RFI as we may choose to make separate awards. Limit submittal to 20 pages.

- Current forecasted bid opportunities are subject to change or cancellation due to scope, mission, or funding requirements.
- Some procurements are reserved for small businesses. Note the competition type on the forecast matrix to determine if a procurement has been set aside or is open to fair and reasonable competition.
- LANL reserves the right to change the competition type from Competitive to Set-Aside prior to the release of the Request for Quotation (RFQ).
- If this is a Request for Expression of Interest and capability information is requested with your response, be advised that LANL will not issue your organization a Request for Quotation unless you submit clear and convincing information that your organization has the necessary relevant experience and can fulfill the requirements of the statement of work. If you do not adequately address the required information, and the LANL Buyer does not have information indicating otherwise, the presumption will be that your organization is not a viable competitor. In any case, the LANL Buyer is the final arbiter on who receives an RFQ.
