

HIV – The Science of a Pandemic: Evolution, Dynamics, Epidemiology and Medicine

Four Short Lectures and a Panel Discussion with:

Dr. Bette Korber, Dr. Alan Perelson, Dr. Rajan Gupta - Los Alamos National Laboratory

Dr. Trevor Hawkins - Southwest CARE Center

Co-Sponsored with the Santa Fe Institute and the Southwest CARE Center

January 23, 2002

36 million people are infected with HIV - AIDS and the number grows by the day. These lectures will try to shed some light on how we got here and what we can do about this and future epidemics. Better Korber will discuss where the virus came from and where it's going. Alan Perelson will talk about how the virus does what it does. Rajan Gupta will present the global aspects of the virus. Trevor Hawkins will discuss treatment and prevention, now and in the future.
