

## Museum director featured during TEDxLANL event

August 1, 2016

On May 19, Linda Deck, director of the Bradbury Science Museum, delivered a talk during the Lab's third TEDxLANL event. First of eight speakers, the title of her talk was: *Tomorrow's history made fresh daily.*

During her presentation, Linda covered the new partnership between the Department of Energy and the National Park Service to create the Manhattan Project National Historical Park. She also highlighted the various sites on Lab property being readied for eventual public visits. Linda noted this it is the history of the Manhattan Project that frequently draws people to the Museum. However, once there, there's an opportunity to learn about the important work that's done today that rests on the shoulders of that history.

Linda's eight-minute talk, originally presented at [TEDxLANL](#).

If you'd like to review all the talks for this and previous years go [here](#) and watch the talks labeled TEDxLANL for the various years.

TED and TEDx talks follow a specific format and the philosophy of [TED.com](#).
