

Computer System, Cluster, and Networking Summer Institute

An NSF-funded undergraduate summer intensive

- Highly-selective, 9-week program designed for third year (i.e., Junior) undergraduates, although Sophomores and Seniors may be considered.
- Students work in small project teams to execute real-world projects on computer clusters that they have assembled and configured.
- A university instructor provides class instruction
- Subject matter experts from Los Alamos National Laboratory mentor the team projects which are presented at a technical symposium at the conclusion of the Summer Institute

**Application Dates:
Jan 9–Feb 17, 2012**
