

Environmental Science Student Program

Issue No. 84

Program Coordinator

Name Michael McNaughton

Phone # +1 505 667 6130

Program Description:

The purpose of this program is to identify, encourage, and develop a mutually beneficial collaboration between LANL and the University of New Mexico –Los Alamos. The program will facilitate and encourage student internships, field experiences, and the use of resources such as the LANL meteorological stations, and industry-standard computer. It is also aimed at fostering interest and strengthening the understanding of environmental science through the use of publicly-accessible resources in the environment near LANL.
