

3rd Annual R&D Electrical Safety Meeting & Workshop

**February 27 – March 2, 2006
NNSA Energy Training Complex (ETC)
Albuquerque, New Mexico**

There is NO registration fee to attend this meeting and workshop

R&D Electrical Safety Meeting and Workshop

This is the 3rd annual R&D Electrical Safety Meeting and Workshop. The purpose of the workshop is to engage all DOE laboratories and contractors that perform research and development (R&D) activities in an exchange of information on electrical safety in the R&D environment.

Objective #1

To share methods and successes from various DOE sites in R&D electrical safety topics.

Objective #2

To further develop material for new DOE Electrical Safety Handbook Chapters, for input into the EFCOG Electrical Safety Improvement Project.

Objective #3

To discuss the implementation of NFPA 70E across the complex, including interpretation as it applies to R&D work.

Solicitation for Presentations

We invite you to attend and contribute to the discussions on R&D electrical safety programs. Please submit an abstract at your earliest convenience.

Submission, Registration, Albuquerque Area information, and Accommodations

Available on our webpage after January 18, 2006. We will notify you.

Proposed Program & Workshop Topics

Electrical Hazard Classification (DC, RF, Batteries, etc. . .)
Electrical Safety Training for R&D Workers
Unlisted Electrical Equipment Inspection and Approval
2004 NFPA 70E - Electrical Safety in the Workplace
Electrical Personal Protective Equipment in the R&D Environment
Accelerator Electrical Safety, including rf hazards
Standards for R&D Electrical Safety
Reporting Criteria and Performance Measurement
Reduction of Energized Electrical Work
Electrical Pulsed Power Safety, including capacitors

2006 Meeting Organizers

Lloyd B. Gordon, Los Alamos National Laboratory
Donald M. Bourcier, Los Alamos National Laboratory
