

Innovators' Forum

3:30 p.m. – 6:00 p.m.

Tuesday, November 18, 2008

Los Alamos Research Park Conference Room

Got Funds?

“Celebrating Six Years of the Technology Maturation Program”

**Did you know that your technology could advance toward commercialization through industrial interactions?
Do you need a small amount of funding to reach proof-of-concept?**

Come learn how many Los Alamos researchers have accessed unburdened dollars to mature their innovations and how you can too!

Since 2002, the Technology Transfer Division's Technology Maturation Fund has provided over \$2.1M of funding to 50 projects to move early stage technologies along the road to commercialization. This has resulted in 9 license agreements, 6 Cooperative Research and Development and Work for Others agreements, and 9 new disclosures. These awards are not for a specific time period but rather to achieve a specific milestone in a defined development path.

Join us for this networking event where we will discuss the launch of TT's Technology Maturation Fund 2.0 with enhancements to ensure greater success in the commercialization of the Laboratory's cutting-edge innovations.

This Innovators' Forum will feature a panel of recipients who have received awards through the Technology Maturation Program. Please join us to hear how the recipients have successfully used these funds to advance their technology towards commercialization.

What is Innovators' Forum?

Entrepreneurs are the critical force behind innovation and new wealth creation in tech-based economies. Our mission is to provide innovators with a networking opportunity and fresh insights into the world of start-ups, spin-offs and the management of small technology businesses.

RSVP contact

For more information about Innovators' Forum, to RSVP for the November 18 event, or to be added to the mailing list, please contact Shandra Clow at 505-665-3049, or clow@lanl.gov.

Innovators' Forum is sponsored by the Northern New Mexico Connect, Los Alamos National Laboratory (LANL) Technology Transfer Division, LANL Community Programs Office, Technology Ventures Corporation (TVC) and the Los Alamos Commerce and Development Corporation (LACDC).
