Performance Portability @ Intel

- Committed to open standards.
  - (e.g. MPI, OpenMP*, C, C++, Fortran)

- No plans to enable proprietary programming models / runtimes.
  - Not ruling out contributions to open-source runtimes built on standards.

- Performance portability is a **shared** responsibility.
  - We want achieving performance on our hardware to be productive.
  - We can't guarantee performance on or portability to other platforms.
Legal Notices and Disclaimers

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Learn more at intel.com, or from the OEM or retailer.

Tests document performance of components on a particular test, in specific systems. Differences in hardware, software, or configuration will affect actual performance. Consult other sources of information to evaluate performance as you consider your purchase. For more complete information about performance and benchmark results, visit http://www.intel.com/performance.
