

# Prime named Society for Experimental Mechanics Fellow

**Michael Prime** of Advanced Engineering Analysis (W-13) was recently nominated as a Fellow in the Society for Experimental Mechanics. The honor is reserved to a select group of people that have made notable contributions to the Society and the field of Experimental Mechanics as a whole.

Prime's nomination comes "in recognition of distinguished contributions in developing methods to probe the mechanics of residual stress including contour method and diffraction methods, and service to the field of mechanics through the Society."

Prime will be honored either at the Awards Luncheon or the Annual Conference 2021.
