

## Please join the LANL Lab Fellows in Congratulating their Colleague Dana Dattelbaum as a 2020 Ernest Orlando Lawrence Award Winner!

From DOE's Office of Science Announcement:

**Dana M. Dattelbaum (Los Alamos National Laboratory) - National Security and Nonproliferation -**

Honored for “several transformative scientific and intellectual achievements, including her pioneering work providing physical insights into shock and detonation physics, her innovations in the development of the Equations of State of a spectrum of energetics and polymers, and providing critical data for hydrodynamic simulations essential to the nuclear weapons program.” Dattelbaum has played a pivotal and leading role in advancing the experimental study of materials under extreme conditions at Los Alamos National Laboratory.
