PR/Subcontract # \_\_\_\_\_

LANS is responsible for the safety and environmental compliance requirements associated with work performed on site at Los Alamos National Laboratory (LANL) in accordance with this Subcontract. A LANL line manager (RLM), who is a qualified AdSTR and has been appointed to act as the AdSTR for the referenced subcontract, shall be responsible and accountable for the safety and environmental compliance for all work activities performed onsite at LANL by the Subcontractor's employees as described in Exhibit D Scope of Work under this Subcontract.

The Subcontractor shall ensure that their employees who perform onsite work under this Subcontract understand that they must comply with all LANL on-site rules, regulations, policies, and procedures. These procedures shall be made available to the Subcontractor upon request.

For work performed on site at LANL in accordance with this Subcontract, the LANL RLM shall be responsible for ensuring that Subcontractor's employees: are properly briefed on all applicable LANS safety and environmental compliance requirements; complete all required training; and understand and follow all LANL rules, regulations, policies and procedures.

This form documents the delegation of safety and environmental compliance management responsibilities for the Subcontract worker(s) to the LANL RLM who is responsible for the work associated with this subcontract.
