

Science bowl

Program Description

The Science Bowl® is a nationwide academic competition that tests students' knowledge in all areas of science and mathematics. Middle and high school student teams from diverse backgrounds are comprised of four students, one alternate, and a teacher who serves as an advisor and coach.

These teams face-off in a fast-paced question-and-answer format, being tested on a range of science disciplines including biology, chemistry, Earth science, physics, energy, and math.

The Department of Energy (DOE) created the National Science Bowl in 1991 to encourage students to excel in mathematics and science and to pursue careers in these fields. More than 225,000 students have participated in the National Science Bowl throughout its 23 year history, and it is one of the nation's largest science competitions. DOE's Office of Science manages the National Science Bowl®, and

Sponsors

Los Alamos National Laboratory, the Public Service Company of New Mexico, Albuquerque Public Schools and Sandia National Laboratories are sponsors of the regional event.
