6 postdocs take home Science in ‘3’ honors

Last month, 30 postdoctoral researchers participated in the Science in “3” career development event. Postdocs were given three minutes to present their research in such a way the general public could understand.

Review Panel members evaluated the postdocs’ presentations based on clarity and conciseness. Three postdocs won “Outstanding Presentation” awards, while three others were presented with honorable mentions.

The recipients were identified and commended at a reception following the “Science in 3 event.”

Outstanding Presentation award recipients

- **Eric Davis**, MPA-11: “If Explosives Could Talk”
- **Christina Hanson**, MST-7: “Putting Airplanes and Space Shuttles on a Diet”
- **Derrick Kaseman**, B-11/E-6: “Identification of Organophosphorus Chemical Warfare Agents (CWAs), Precursors, and Decomposition Products with a Fieldable Spectrometer using Earth’s Magnetic Field”

Honorable Mention recipients

- **Deborah Shutt**, A-1/CCS-6: Mathematical and Computational Tools to Identify Characteristics of Infectious Diseases and Inform Public Health Policy”
