
Faces of Science: Roger Wiens

March 4, 2015

Wiens' passion for space has no limits

At nine years old, Roger Wiens built a telescope to sketch the features of Mars.

Faces of Science: Roger Wiens

Forty years later he returned to the Red Planet, this time as part of a team that invented ChemCam, a device aboard the rover Curiosity.

Using a laser that packs the energy of a million light bulbs into a spot the size of a pinhead, ChemCam blasts pieces of Martian rock in search of elements like carbon and oxygen—some of the basic building blocks of life.
